BRICS Workshop on Access to Medicines and Trade Agreements
[23 May 2016 : Geneva]

The BRICS Workshop on Access to Medicines and Trade Agreements was organised on 23 May 2016 in Geneva.

The meeting was organised around the panel discussions to deliberate upon the challenges and opportunities related to access to medicines, particularly in the context of the SDGs and the recent trends in trade negotiations.

The meeting, *inter alia*, focussed on adverse implications of trade agreements on access to medicines and mobilisation of support for developing a common agenda against the standards of protection that go beyond the TRIPS agreement.
